- 2.1. Setting and Options
- 2.2. Listing Category settings
- 2.3. Single Listing options

Motors – Car Dealership and Classifieds Wordpress Plugin

Powered by StylemixThemes

www.stylemixthemes.com

1. Getting Started

This plugin allows you to build a classifieds listings or dealership listing website. Easily import your listings, set taxonomies, manage subscriptions, use our optimized search filter. Feel free to provide your feedback. If you need a ready theme for your business, you can purchase it here: <http://stylemixthemes.com/demo/motorswp>.

1.1. Install Motors

If you have web hosting and would like to install Motors, using the WordPress Admin is the most straightforward option, as it handles the file transfer without you needing to leave the Web browser. To install Motors:

1. **Log into** your WordPress Admin panel.
2. Go to: **Plugins > Add New**.
3. **Type** 'Motors' into the Search Plugins field and hit Enter. Once found, you can view details on the point release, rating and description.
4. **Click** Install Now. After clicking the link, you'll be asked to confirm this action.
5. **Click** Yes, and WordPress completes the installation.

1.2. Import the demo

If you want to import the demo content, in plugin files you will find a **dummy_content** directory. There are two files: **listing_categories.json** and **dummy-content.xml**. Firstly, go to **Listings -> Listing Categories** and on your top right side will be settings import, where you need to upload **listing_categories.json**. After that, go to **Tools -> Import**, and tool install the **dummy-content.xml** via [Wordpress Importer](#).

Plugin includes 4 pages: Listing Inventory, Add a car Page, Compare Page, Single Listing page and author profile (private and public).

The image shows two screenshots of the WordPress admin interface. The top screenshot displays the 'Vehicle listing Settings' page. It features a sidebar with 'Listings' selected. The main content area has a table with columns for 'SINGULAR', 'PLURAL', 'SLUG', 'NUMERIC', 'MANAGE', and 'EDIT'. Below the table is an 'ADD NEW' button. In the top right corner, there is a 'Choose a file...' input field, a 'Get my settings' button, and another 'Get my settings' button. The bottom screenshot shows the 'Tools' page. The sidebar has 'Tools' selected. The main content area lists various import tools: 'Tumblr' (Import posts & media from Tumblr using their API), 'WordPress' (Import posts, pages, comments, custom fields, categories, and tags from a WordPress export file), and 'Run Importer' (highlighted with a red box). Each tool has an 'Install Now' or 'Run Importer' button and a 'Details' link.

1.3. Shortcodes

There are some shortcodes in order to create related pages for the plugin:

Add a car page:

```
[stm_add_a_car_page]
```

Compare page:

```
[stm_add_compare_page]
```

Login page:

```
[stm_add_login_page]
```

Listing Inventory page:

```
[stm_add_listing_inventory]
```

1.4. Automanager XML Import

How to Set Up [WebManager](#) XML Import:

1. Log into WebManager but keep this page in a separate tab. (Note: If you are not a WebManager subscriber, [click here](#) for a free trial.)
2. On the top navigation bar, select **Settings**, then **Website**, and click **Inventory Integration**.
3. Under **Inventory Feed Settings**, add any **Security ID**, check the **Enable Box**, & click **Save Changes** at the bottom.
4. Under **Inventory Feed Settings** next to Example, select and copy the link.
5. Return to this page, and under **XML URL**, paste the copied link in the field and click **Upload File**.

2. Plugin Features

2.1. Settings and Options

WordPress Customize allows you to setup the general settings of the plugin. In WordPress menu go to **Appearance > Customize -> Listing**. Here you can setup most important options of your plugin.

Inventory settings:

- **Listing archive:** Here you need to select main Inventory page.
- **Price currency & position:** You can price currency and position here.
- **Price delimiter:** Price delimiter will be used for thousands.

The screenshot shows the 'Inventory settings' panel in the WordPress Customizer. The breadcrumb trail at the top reads 'Customizing > Listing > Inventory settings'. The panel contains the following settings:

- Listing archive:** A dropdown menu with a downward arrow. Below it is the text 'Choose listing archive page'.
- Price currency:** A text input field containing the dollar sign '\$'.
- Price currency position:** A dropdown menu with 'Left' selected and a downward arrow.
- Price delimiter:** An empty text input field.
- Show stock:** A checked checkbox.
- Show compare:** A checked checkbox.

Single Listing Settings: Here you can select options in order to show/hide on Single Listing page.

Powered by StylemixThemes

www.stylemixthemes.com

User/Dealer options:

- **Add a Listing page:** Choose page for Add to car Page (Also, this page will be used for editing items).
- **User post and Upload image Limits:** You can set your own amount for limiting User posts and uploading images count.
- **Enable User ads moderation:** This option allows to Admin moderating added Listings before publishing.

The screenshot shows the 'User/Dealer options' settings page. At the top, there is a breadcrumb trail: 'Customizing > Listing > User/Dealer options'. Below this, the settings are organized into a light gray box. The first section is 'Add a car page', which contains a dropdown menu. Below the dropdown is the text: 'Choose page for Add to car Page (Also, this page will be used for editing items)'. The second section is 'User Posts Limit:', with a text input field containing the number '3'. The third section is 'User Post Images Upload Limit:', with a text input field containing the number '5'. At the bottom, there are two checkboxes: 'Enable User ads moderation' (checked) and 'Site demo mode' (unchecked).

3.2. Listing Category settings

You can modify or add your own filter options via **Listings** -> **Listing Categories**. Via editing a Listing Category you can set up filter option, visualization, and other settings. In order to modify Listing taxonomies, you need to go via **manage** icon.
